(54) Title: OPTICAL ARTICLES AND SOL-GEL PROCESS FOR THEIR MANUFACTURE

(57) Abstract: An optical article, having an almost complete isotropy and dimensions equal to or lower than 500 μm , is prepared by a sol-gel procedure comprising a preliminary step wherein the mould is filled cold with a sol containing the desired oxide precursors, sol gelation, gel drying, removal of the gel from the mould and the subsequent miniaturization of the dried gel. The optical article can be used for optic telecommunications.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
